and the state of t
Gargo Operations Vessel pumped ballast before boarding inspection, cleaned
tanks after inspection was completed, received clearance to load at 082000A
and commenced leading carge immediately from two 6" pipelines leading
from rive benzol storage tanks. Vessel loaded 2557 metric tons benzol at a
rate of approximately 200 tons per hour, and completed operation at 091100A
Four or five line operators were on duty on the wharf and absard ship
during the leading operation.

11. Surveillance Two sentries armed with rifles and stationed on the wharf maintained a 24-hour surveillance on vessel. Only vessel\*s master was allowed to go ashore.
